Project Report On

“Vehicle Renting Website(Java Development)”

Subject

Internship

Submitted To Savitribai Phule Pune

University

Third Year in Computer Engineering

Department Of Computer Engineering

**SVPM's COLLEGE OF ENGINEERING,
DEPARTMENT OF COMPUTER ENGINEERING**

This is to certify that the Internship entitled
“Vehicle renting website”
In
“Internpe Pvt Ltd”

Submitted by

Name of student:-Tate Deshmukh Rutuja

Roll No:370

is a bonafide work carried out by Students under the supervision of Prof.V.G.Jagtap and it is submitted towards the partial fulfillment of the requirement of Bachelor of Engineering (Computer Engineering) Internship.

chapter1

INTRODUCTION

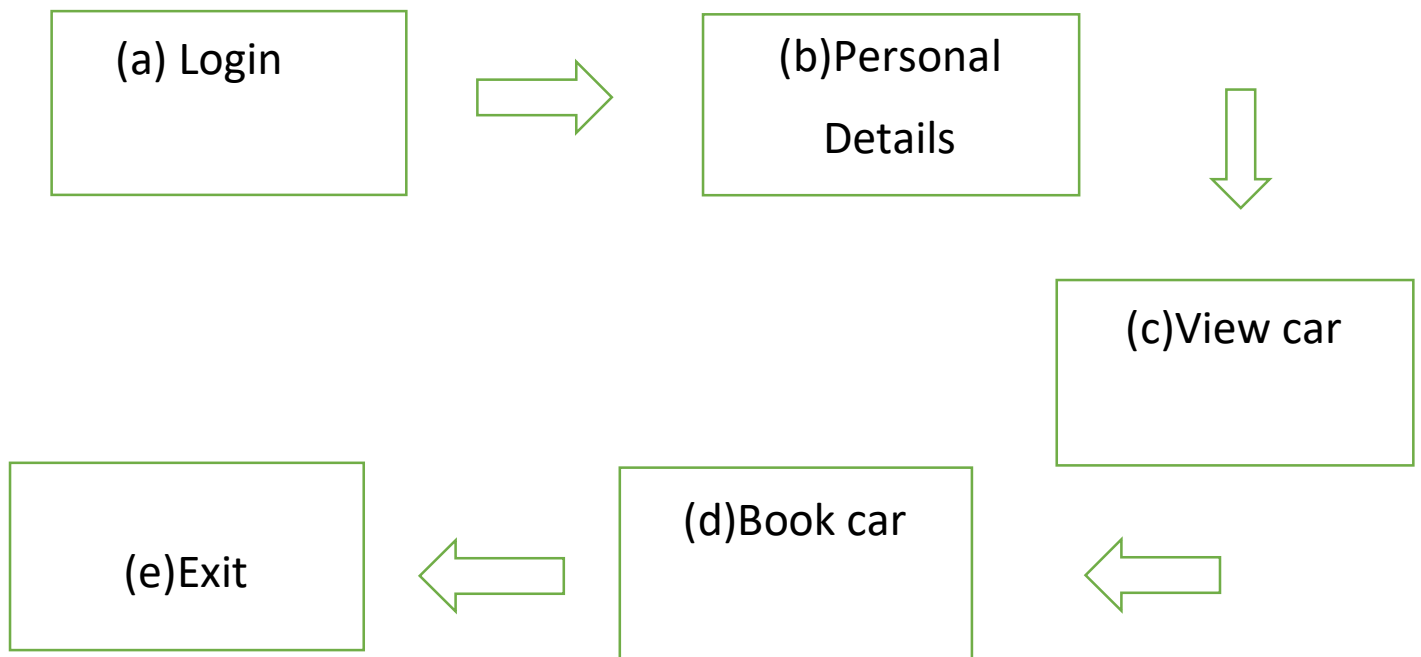

The Vehicle Renting management system is intended to increase accuracy, safety, and efficiency in the renting. It is a computer-based system that stores important information and makes rental stores run better.

The Vehicle Renting Management system is built in order to replace manual based system to computerized. Here system is expected to be efficient, useful and affordable on implementing tasks that is order by the medical manager.

Problem statement:

The Manual vehicle rental system provides services only during office hours. So, customers have limited time to make any transactions or reservation of the cars. The existence of the online vehicle rental systems nowadays has overcome the limitation of the business operation hour. Besides that, there are some customers who faced a problem in choosing car to be rented which suitable with some of the important requirements.

SYSTEM ARCHITECTURE

ALGORITHM

Step1: Collect User Information

Step 2: Search for Available Vehicles

Step3: Display Available Vehicles

Step 4: Reserve the Vehicle

Step 5: Update Inventory

Step 6: Manage Reservations

Step 7: Return the Vehicle

chapter7

TECHNOLOGY USED

Hardware Requirements:

- Processor: Intel(R) Core(TM) i5-10300H CPU @ 2.50GHz 2.50 GHz
- RAM: 16 GB
- Monitor: 15 inch colour monitor
- Processor speed: 2.10 GHZ
- SSD: 512 GB
- Keyboard: built in keyboard
- Mouse: track-pad

Software Requirements:

- Vs Code
- Google chrome
- Apache NetBeans
- Windows 11
- JDBC
- MySQL Workbench

chapter10

Conclusion

In conclusion, the system will be able to serve as a web base application when it is finally developed, where these small upcoming companies can make use of it to publish their services in a wide range and also help the company to manage their service more effectively. On the other hand, it will enable customers to freely make their desire choice more freely and interactively.

CERTIFICATE

@internPE

COMPLETION CERTIFICATE

CID : IPI#2436

To whomever it may concern

This is to certify that **Rutuja Tate Deshmukh** worked as a Intern in our company from **13-Mar-2023 to 23-Apr-2023**

Please find the internship details below:

Company Name: InternPe

Location: Remote

Domain: JAVA Programming

Designation: Intern

During their working period, we found him/her to be a sincere and dedicated intern with a professional attitude and very good knowledge of the job.

We thank him/her for their efforts and contribution and wish him/her the best in future endeavors.

Yours Sincerely

(Co-Founder)
InternPe
